PHILIPS TECHNICAL REVIEW

VOLUME 17

1955/1956

PHILIPS RESEARCH LABORATORIES – EINDHOVEN

CONTENTS

VOLUME 17, 1955/1956

LIGHT

Page

Supply units for airfield light beaconing systems, by Th. Hehenkamp 10

The "TL"F lamp, a tubular fluorescent lamp with a directional light distribution, by J. J. Balder and M. H. A. van de Weijer . . 198

Page

A new fluorescent lamp in a starterless circuit, by W. Elenbaas and T. Hehenkamp . . . 288

TELECOMMUNICATIONS

A television receiver suitable for four standards, by H. L. Berkhout 161

The "Scenioscope", a new television camera tube, by P. Schagen, J. R. Boerman, J. H. J. Maartens and T. W. van Rijssel 189

Simple theory of the junction transistor, by F. H. Stieltjes and L. J. Tummers 233

Beam transmitters with double frequency modulation, by C. Ducot 317

The multi-reflex klystron as a transmitting valve in beam transmitters, by F. Coeterier 328

Automatic frequency stabilization for a beam transmitter working on centimetric waves, by J. Cayzac 334

The F.M. section of modern broadcast receivers, ... 341

I. Circuitry and structural design, by H. de Quant and P. Zijp 342

II. The built-in F.M. aerial, by M. Huissoon 348

X-RAYS AND NUCLEAR PHYSICS

*Linear electron accelerators for deep X-ray therapy, by T. R. Chippendale 31

*An X-ray tube for microradiography, by B. Combée 45

The EM 75 kV, an electron microscope of simplified construction, by A. C. van Dorsten and J. B. Le Poole 47

The application of the X-ray image intensifier, I. General survey, by M. C. Teves . . . 69

II. The perception of small object-detail, by T. Tol and W. J. Oosterkamp . . . 71

III. Optical aids for the image intensifier, by P. M. van Alphen 77

IV. Equipment for spot film radiography incorporating an image intensifier fitted with a periscope optical system, by H. Verse and H. Jensen 84

V. Medical aspects of the image intensifier, by J. Feddema 88

VI. Industrial radiology with the image intensifier, by G. Lang and R. O. Schumacher 93

*A generator for fast neutrons, by A. C. van Dorsten 109

The "Symmetrix", a universal table and stand for X-ray diagnosis, by J. J. C. Hardenberg and H. W. Dumbrill 112

A novel type of diagnostic X-ray unit, by H. Verse and K. Weigel 138

X-ray intensity measurements with counter tubes, by W. Parrish 206

The "Norelco" counting-rate computer, by E. A. Hamacher and K. Lowitzsch 249

X-ray spectrochemical analysis, by W. Parrish 269

SOUND

The recording and production of gramophone records, by J. L. Ooms 101

A comparison between reproduced and "live" music, by R. Vermeulen 171

Stereo reverberation, by R. Vermeulen . . . 258

*A transistor hearing-aid, by P. Blom . . . 315

*) Articles marked with an asterisk * are brief reports.

MEASURING EQUIPMENT

Page

Electronic control of industrial processes, by H. J. Roosdorp 21

Electronic equipment for the continuous monitoring of turbines, by C. von Basel, H. J. Lindenhovius and G. W. van Santen 59

A simple and reliable ionization manometer, by E. Bouwmeester and N. Warmoltz . . 121

Page

X-ray intensity measurements with counter tubes, by W. Parrish 206

The "Norelco" counting-rate computer, by E. A. Hamacher and K. Lowitzsch 249

*An electrical clinical thermometer, by C. C. J. Addink 255

X-ray spectrochemical analysis, by W. Parrish 269

MATERIALS AND THEIR RESEARCH

Industrial radiology with the image intensifier, by G. Lang and R. O. Schumacher 93

A technique for machining tungsten, by R. Levi 97

Capacitor materials with high dielectric constant, by G. H. Jonker 129

The gloss point of glazes, by R. W. P. de Vries 153

*A machine for bend tests, by M. J. W. Geenen 246

X-ray spectrochemical analysis, by W. Parrish 269

MISCELLANEOUS

Mains-voltage stabilizers, by R. B. Stephens . 1

Electronic control of industrial processes, by H. J. Roosdorp 21

Stud welding with welding cartridges, by W. P. van den Blink, E. H. Ettema and P. C. van der Willigen 37

Research on the control of animal pests, by J. Meltzer 146

A simple ultramicrotome, by H.B. Haanstra . 178

*A high-vacuum tap with short outgassing time, by J. Horseling 184

Fungicide research, by M. J. Koopmans . . . 222

Growth substances in plants, by R. van der Veen 294

*A cinema projector for 70 mm and 35 mm films, by J. J. Kotte 299

A receiver for the radio waves from interstellar hydrogen, by C. A. Muller:

I. The investigation of the hydrogen radiation 305

II. Design of the receiver 351

Science goes to the fair, by G. Remedi . . . 362

*) Articles marked with an asterisk * are brief reports.
